In Context – A Comprehensive Approach to Watershed Management

Building upon the Past – Envisioning the Future

Los Peñasquitos Lagoon Enhancement Plan Update (Workshop I)

October 20, 2012

Bill Harris, Storm Water Division
Transportation & Storm Water Department
City of San Diego

Drivers

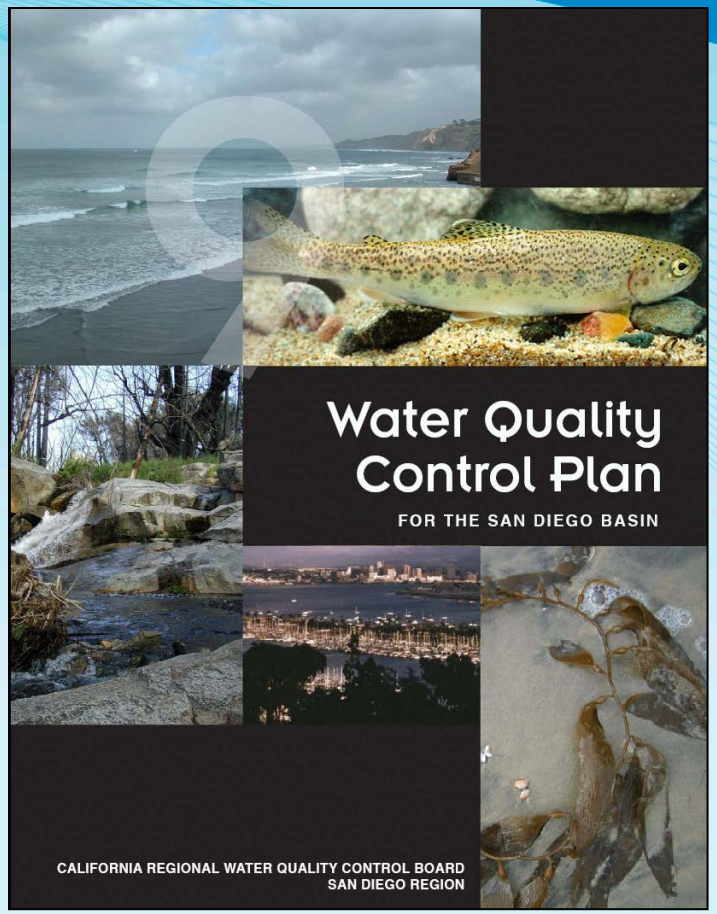
- Draft Municipal Permit
- Bacteria TMDL
- Sediment TMDL
- Aging / under-designed storm drain system

Opportunities

- Lagoon serves as unifying resource
- Prior coordination successes
- Sediment Total Maximum Daily Load (TMDL) for LPL and Draft Regional Storm Water Permit allow for adaptive management
- Storm drain projects… integrate BMPs

Partnership Opportunities

- **Ecological Objectives may…**
  - More closely represent true watershed goals
  - Facilitate integrated planning efforts
- **Need better measures of success**



Partnership Opportunities

- Long-term vision for the Lagoon?
- What services does the Lagoon provide? (e.g. water quality, aesthetics)
- How can water quality and enhancement efforts support each other?
- How do we phase activities?

Partnership Opportunities

- Updating the 1985 Los Peñasquitos Lagoon Enhancement Plan and Program
- Watershed planning – Comprehensive Load Reduction Plan (CLRP)
- Watershed projects (e.g. restoration basin)
- Lagoon mouth maintenance
- Grants
